

# High Security Deadbolts

Deadbolts are locks designed specifically for security – however they are not all equal. Simply compare a big-box or store-bought deadbolt with a commercial Grade 1 or Grade 2 quality deadbolt and the differences are immediate and clear. They're built to take abuse, resist fire, attacks, and hold fast.

DOREX GX1 and TLA deadbolts are quality commercial grade deadbolts whose security features have been enhanced with CX5 cylinders. These deadbolts now not only can resist abuse, fire, and physical attacks, but also picking, bumping, and drilling attempts. While CX5 geographically controlled keys ensure only authorized CX5 resellers have access to your key.

## DOREX GX1A (GRADE 1) CX5 CYLINDER INSIDE

SFIC model available

- // Conforms to ANSI/BHMA A156.5 Grade 1
- // cULus Listed, 3hr Fire-rating
- // For doors 1 9/16–2" (40–51 mm) thick
- // 2 3/4" (70 mm) backset
